The Software must be distributed as a component of an application and bundled with an application or with the application's installation files. Therefore, a valid copyright notice must be provided within the User documentation, start-up screen or in the help-about section of your application that specifies PrecisionID as the provider of the Software bundled with Your application, for example: "<<your application name>> contains barcode components Licensed from PrecisionID. These components may only be used as part of and in connection with <<your application name>>."
